SUBJECT: Pathways for Wildlife Connectivity Presentation on Pacheco Pass Highway SR-152

Recommended Action: Receive Presentation. The presentation will focus on camera data collected from August 2018 to March 2019. A total of 2,370 wildlife passages have been recorded at three bridges and two culverts along SR-152 Pacheco Pass. Data will also be presented on wildlife-vehicle collisions for an eight-month period. Lastly the presentation will touch on storm related events and seasonal variation as it relates to wildlife crossing SR-152.
